

VISHAL SHARMA

+91-8218837039 sharma2005vishal@gmail.com Kanpur, India

LinkedIn GitHub LeetCode Portfolio

Technical Skills

Languages : Java, Python, JavaScript, SQL
Backend : Spring Boot, Spring MVC, Spring Security, REST APIs, Hibernate, Microservices
Databases : MySQL, PostgreSQL, MongoDB
Frontend : HTML, CSS, React, Tailwind CSS
AI / ML : Machine Learning, Deep Learning, NLP, Generative AI, RAG, Azure AI, Amazon Q
Tools & DevOps: Docker, AWS, Git, GitHub, Maven, Postman

Education

Dr. AITD, Kanpur (AKTU) 2023 – 2027 (Expected)
Bachelor of Technology in Computer Science Engineering CGPA: 7.04 / 10

- **Relevant Coursework:** Data Structures & Algorithms, System Design, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming, Software Engineering

Projects

SmartHire – AI Resume Driven Interview System Code Live
Spring Boot, React, Groq API (LLaMA 3), PostgreSQL, JWT

- Architected a full-stack **AI-driven mock interview platform** using **Spring Boot** and **React**, streamlining resume-based interview prep into a single guided workflow.
- Integrated **LLM (LLaMA 3 via Groq API)** for resume parsing and context extraction, dynamically generating role-specific technical and HR questions tailored to each candidate.
- Designed an **AI-based answer evaluation engine** that scores responses on correctness, clarity, and depth, giving users targeted, actionable feedback instead of generic tips.
- Secured the platform end-to-end with **JWT-based authentication** and reduced response latency through **asynchronous processing** and efficient prompt engineering.

Sign Language Detection System Code
Python, NumPy, Pandas, Seaborn, Scikit-learn, ANN, CNN

- Designed and trained a **gesture recognition pipeline** using **CNN and ANN** architectures to classify sign language gestures for real-time interpretation.
- Strengthened model robustness through **data preprocessing, feature engineering, and exploratory analysis** (Pandas, Seaborn) to correct class imbalance and reduce noisy predictions.
- Benchmarked **CNN against ANN** architectures across gesture classes and selected the higher-performing model to improve reliability for assistive, real-world use.

E-Commerce Backend System Code
Spring Boot, PostgreSQL, Spring Security, OAuth 2.0, JPA/Hibernate

- Built a **production-style e-commerce backend** with Spring Boot, implementing **JWT and OAuth 2.0** (Google & GitHub SSO) via Spring Security for secure, role-based access control.
- Modeled a normalized relational schema in **PostgreSQL** using Spring Data JPA/Hibernate, covering Users, Products, Orders, and Cart with referential integrity across services.
- Engineered **real-time search autocomplete**, keyword search, and category filtering with paginated APIs, plus stateless, token-authenticated cart management for scalable session handling.

Achievements and Certifications

- **AIR 102** in NEC 2025 among 4,000+ colleges nationwide, placing in the top **2.5%** overall.
- Led a 6-member team as Team Leader in Smart India Hackathon 2024 – shortlisted in Top 50.
- Solved **200+ DSA problems** across LeetCode and coding platforms.
- **CodeChef Starter Contest 237:** Achieved **Global Rank 824**.
- **JP Morgan Chase — Software Engineering Virtual Experience Program** – Completed via Forage (2026), covering backend service development, REST API design, and unit testing with Spring Boot and JUnit.
- **Generative AI Essentials & AI and Cybersecurity Awareness** – Certified under the "AI for All" program by MPIT-CoE in partnership with TCS Foundation, via TCS iON (Apr 2026).
