PROFESSIONAL SUMMARY

Software Development Engineer / Java Backend Developer with expertise in building scalable RESTful API architectures, high-performance web applications, and caching layers using Spring Boot, Spring Security, Redis, and PostgreSQL. Strong foundation in Data Structures & Algorithms (300+ problems solved), Object-Oriented Design, and relational database query optimization. Demonstrated technical leadership by guiding a 6-member engineering team to a Top 50 finish at Smart India Hackathon.

TECHNICAL SKILLS

Programming Languages: Java (Core & Advanced), JavaScript, SQL

Backend Frameworks & Architecture: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate ORM, REST APIs

Databases & Caching: Redis (Caching, Rate Limiting), PostgreSQL, MySQL, MongoDB

DevOps, Tools & Testing: Docker, Git, GitHub, Maven, Postman, JUnit 5, CI/CD Basics, Vercel, Render

AI Tools & Cloud Technologies: Amazon Q, Prompt Engineering, LLM API Integration, OAuth 2.0, JWT

TECHNICAL PROJECTS

Distributed Rate Limiter Service

Spring Boot, Redis, PostgreSQL, Docker, Spring Data JPA

github.com/sharmaVishal2/Distributed-Rate-Limiter

- Engineered an API rate-limiting middleware to throttle traffic spikes and maintain high backend availability.
- Implemented configurable Token Bucket and Sliding Window Counter algorithms, maintaining sub-5ms evaluation latency.
- Utilized Redis atomic operations (INCR, EXPIRE) for reliable key-state management and accurate request count tracking.
- Accelerated service development and boilerplate scaffolding by leveraging AI coding assistants (Amazon Q).

E-Commerce Backend Platform

Spring Boot, PostgreSQL, Spring Security, OAuth 2.0, Hibernate

github.com/sharmaVishal2/E-Commerce-Application-by-Java-Spring-Boot

- Architected a modular enterprise backend supporting product catalog, shopping cart state management, and order lifecycles.
- Secured endpoints with Spring Security, implementing stateless JWT authentication and OAuth 2.0 social login.
- Optimized relational database queries via PostgreSQL indexing and Hibernate batch fetching, slashing response times by ~15%.
- Implemented dynamic multi-attribute search and paginated filtering mechanisms using Spring Data JPA Specifications.

ACHIEVEMENTS & CERTIFICATIONS

- Smart India Hackathon (SIH):** Team Leader for 6-member squad; shortlisted among Top 50 teams nationwide.
- Competitive Programming:** Solved 300+ DSA problems across LeetCode and CodeChef (Global Rank 48 in PLACEPREP03; Global Rank 824 in Starter Contest 237).
- National Entrepreneurship Challenge (NEC):** Secured AIR 102 among 4,000+ participating engineering institutions (IIT Bombay).
- Software Engineering Virtual Experience – JPMorgan Chase & Co.** (Forge, 2026): Interfaced and optimized RESTful backend APIs, streamlined financial data feeds, and validated system reliability using JUnit 5.
- Generative AI Essentials & Cybersecurity Awareness** (MPIT-COEX TCS Foundation, TCS iON, 2026): Certified in LLM API integration, prompt engineering, secure API endpoints, and vulnerability management.

EDUCATION

Dr. Ambedkar Institute of Technology for Divyangjan, Kanpur (AKTU Lucknow)

2023 – 2027 (Expected)

Bachelor of Technology in Computer Science and Engineering

CGPA: 7.04/10

Relevant Coursework: System Design, Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Kanha Makhan Public School (CBSE), Mathura

2019 – 2021

Senior Secondary (Class XII) 74.2% | Secondary (Class X) 80.4%
