PROFESSIONAL SUMMARY

Java Backend Developer specializing in scalable microservices, REST API design, and distributed systems using Spring Boot, Spring Security, and Redis/PostgreSQL. Solved 300+ DSA problems with a solid foundation in multithreading, concurrency, and system design. Proven leadership demonstrated by leading a 6-member team to a Top 50 finish at Smart India Hackathon.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), Python, JavaScript, SQL

Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices

Distributed Systems & Databases: Redis (Caching, Rate Limiting), PostgreSQL, MySQL, MongoDB, Concurrency & Multithreading

Tools & DevOps: Docker, Git, GitHub, Maven, Postman, JUnit 5, CI/CD Basics, Vercel, Render

Core Concepts & Cloud: OOP, Low-Level Design (LLD), Data Structures & Algorithms, OAuth 2.0, JWT, LLM Integration

PROJECTS

Distributed Rate Limiter Service

Spring Boot, Redis, PostgreSQL, Docker, Spring Data JPA

[GitHub: github.com/sharmaVishal2/Distributed-Rate-Limiter](https://github.com/sharmaVishal2/Distributed-Rate-Limiter)

- Engineered a distributed API rate-limiting middleware to mitigate traffic spikes and prevent cascading service outages.
- Implemented configurable **Token Bucket** and **Sliding Window Counter** algorithms, maintaining sub-5ms evaluation latency under high concurrency.
- Leveraged **Redis atomic operations (INCR, EXPIRE)** to guarantee thread safety and eliminate race conditions across distributed nodes.
- Containerized microservice workflows with Docker and established automated testing using JUnit 5.

E-Commerce Backend Platform

Spring Boot, PostgreSQL, Spring Security, OAuth 2.0, Hibernate

[GitHub: github.com/sharmaVishal2/E-Commerce-Application-by-Java-Spring-Boot](https://github.com/sharmaVishal2/E-Commerce-Application-by-Java-Spring-Boot)

- Architected a production-ready modular backend handling product catalog, shopping cart, checkout, and payment gateway workflows.
- Secured endpoints using **Spring Security** with role-based access control (RBAC), stateless **JWT authentication**, and **OAuth 2.0** social login.
- Optimized relational queries via PostgreSQL composite indexing and Hibernate batch fetching, reducing database response times by **~15%**.
- Developed paginated search and dynamic filtering mechanisms with Spring Data JPA Specifications to optimize multi-attribute querying.

EXPERIENCE & CERTIFICATIONS

- Software Engineering Virtual Experience – JPMorgan Chase & Co.** (Forage, 2026): Designed and interfaced RESTful backend microservices, optimized data feeds, and validated service reliability using JUnit.
- Generative AI Essentials & Cybersecurity Awareness** (MPIT-CoE × TCS Foundation, TCS iON, 2026): Certified in foundational LLM integration, prompt engineering, and application security.

ACHIEVEMENTS

- Smart India Hackathon:** Team Leader for 6-member squad; shortlisted among **Top 50 teams nationwide**.
- Competitive Programming:** Solved **300+ DSA problems** across LeetCode and CodeChef (Global Rank **48** in PLACEPREP03; Global Rank **824** in Starter Contest 237).
- National Entrepreneurship Challenge (NEC):** Secured **AIR 102** among 4,000+ participating engineering colleges.

EDUCATION

Dr. Ambedkar Institute of Technology for Divyangjan (AKTU), Kanpur

2023 – 2027 (Expected)

Bachelor of Technology in Computer Science and Engineering

CGPA: 7.04 / 10

Kanha Makhan Public School (CBSE), Mathura

2019 – 2021

Senior Secondary (Class XII) – 74.2% | Secondary (Class X) – 80.4%
