PROFILE SUMMARY

Backend-focused Software Engineer skilled in **Java**, **Spring Boot**, **PostgreSQL**, **Redis**, and **REST APIs**. Passionate about building scalable backend systems, AI-powered applications, and solving real-world engineering problems.

TECHNICAL SKILLS

Languages : Java, Python, JavaScript, SQL
Backend : Spring Boot, Spring MVC, Spring Security, Spring Data JPA, REST API, Hibernate, Multithreading
Databases/Caching: MySQL, PostgreSQL, MongoDB, Redis
Frontend : HTML, CSS, React, Tailwind CSS
AI / ML : Generative AI, Amazon Q, Prompt Engineering, LLM Integration
Tools & DevOps : Docker, Git, GitHub, Maven, Postman, JUnit, Vercel, Render

EDUCATION

Dr. AITD, Kanpur (Dr. A P J Abdul Kalam Technical University) **2023 – 2027 (Expected)**
Bachelor of Technology in Computer Science Engineering *CGPA: 7.04 / 10*

- **Relevant Coursework:** Data Structures & Algorithms, System Design, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming, Software Engineering, Distributed System fundamentals

PROJECTS

Distributed Rate Limiter Service [Code](#)
Spring Boot, Redis, PostgreSQL, Docker, Spring Data JPA

- Developed a **distributed rate limiting service** using Spring Boot, Redis, and PostgreSQL to regulate API traffic and protect backend services from excessive requests.
- Implemented configurable **Token Bucket** and **Sliding Window** algorithms, enabling efficient request throttling for multiple clients and API endpoints.
- Designed secure REST APIs to manage rate-limiting rules and leveraged **Redis atomic operations** for thread-safe request counting across distributed instances.

GoalFlow – Enterprise Goal Management Platform [Code](#) [Live](#)
Spring Boot, React, PostgreSQL, JWT, Groq API

- Developed a role-based enterprise goal management platform supporting Employee, Manager, and Admin workflows with approvals, quarterly reviews, blocker tracking, and progress monitoring.
- Built secure REST APIs with JWT authentication and integrated Groq AI to generate intelligent goal suggestions and analytics dashboards for productivity insights.

E-Commerce Backend System [Code](#)
Spring Boot, PostgreSQL, Spring Security, OAuth 2.0, JPA/Hibernate

- Built a production-grade **e-commerce backend** using Spring Boot with a normalized PostgreSQL schema across Users, Products, Orders, Cart, Payments, and Reviews.
- Implemented secure authentication using **Spring Security**, **JWT**, and **OAuth 2.0** (Google/GitHub login) for role-based access control and stateless authorization.
- Developed paginated product search, category filtering, and optimized REST APIs using Spring Data JPA and Hibernate to improve query performance and scalability.
- Designed scalable cart and order management services following RESTful architecture while improving development productivity through AI-assisted tooling (Amazon Q).

ACHIEVEMENTS AND CERTIFICATIONS

- **Generative AI Essentials & AI and Cybersecurity Awareness** (Jul 2026) – Certified under the "**AI for All**" program by MPIT-CoE in partnership with TCS Foundation, via TCS iON.
- **JP Morgan Chase — Software Engineering Virtual Experience Program** (Apr 2026) – Completed via Forage, covering backend service development, REST API design, and unit testing with Spring Boot and JUnit.
- Led a 6-member team as Team Leader in Smart India Hackathon 2025 (Sep 2025) – shortlisted in Top 50.
- **AIR 102** in NEC 2025 among 4,000+ colleges nationwide, placing in the top **2.5%** overall.
- **CodeChef Starter Contest 237:** Achieved **Global Rank 824**.
- Solved **300+** **DSA problems** across LeetCode and coding platforms.
